Attn: Master′s and PHD students: Apply for an interdisciplinary one-week (Aug 13 - 17) summer course in the Netherlands

Radboud University, located in Nijmegen, the oldest city in The Netherlands, invites all current Master's and PhD students of psychology, biology, and medicine to take part in an interdisciplinary one-week (Aug 13 - 17) summer course entitled, "Early Programming: How Early Life Shapes Human Development." This highly interactive course looks into recently discovered environmental factors and mechanisms that shape early and long-term human development using evolutionary, biological, and psychological perspectives. Early bird applications are due April 1, 2018 and all applications are due June 1, 2018.
