An Invitation from the Center for Open Science

The Center for Open Science is seeking graduate students, post docs, researchers and academic faculty to participate in a survey to investigate the factors that affect the perceived credibility and use of preprints.

Participation in this study involves:

- A time commitment of 10 to 20 minutes.
- A survey involving your qualitative, subjective evaluation of factors related to the credibility of preprints.

Currently using preprints (either uploading preprints or reading preprints) is not a prerequisite to participating in the study. If you are interested in enrolling in this study, please click the link which will lead you directly to the survey:
https://virginia.az1.qualtrics.com/jfe/form/SV_3kFU2er17VY5uLP.

You must be 18 or older to participate. If you would like more information, please contact this project's research lead, Courtney Soderberg, by email (courtney@cos.io).

Study Title: Signals of Trust in Preprints
IRB Protocol Number: 2192
Principal Investigator: Brian Nosek, Ph.D.
