EVENT

Webinar: The Science of Childhood Trauma and Family Separation

A Discussion of Short- and Long Term Effects

EVENT DETAILS

WATCH THE RECORDED WEBINAR ON YOUTUBE

When?

THURSDAY, JUNE 28, 2018 3:00PM TO
THURSDAY, JUNE 28, 2018 4:00PM

Where?

GoToWebinar

Who?

SRCD

As the U.S. federal government begins the process of reuniting children separated from their families at the U.S./Mexico border, experts will explore the research evidence on how such separation experiences impact children's well-being. Developmental scientists will shed light on what the research indicates for ongoing child well-being post-reunification. Topics will include:

- How the experiences of border detainees might compare to other cases of child separation such as when parents are incarcerated or deployed for military service,
- How child trauma affects brain development, and
- How the age of the child impacts the effects of these separation experiences.

Panelists:

- **Cynthia García Coll, Ph.D**.
  Associate Director of Institutional Center of Scientific Research, Albizu University, Editor, *Child Development*
- **Gabriela Livas Stein, Ph.D.**
  Associate Professor of Clinical Psychology, University of North Carolina, Greensboro
- **Nim Tottenham, Ph.D.**
  Associate Professor of Psychology, Columbia University
- *Moderator:* **Duncan Fisher**, Co-Founder, *Child and Family Blog*
