Request for Feedback: NIH Infant and Toddler Toolbox

Posted on behalf of the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD)

The U.S. National Institutes of Health (NIH) has awarded a contract to a consortium of scientists from over 20 institutions, led by Northwestern University, to develop the **NIH Infant and Toddler Toolbox**, an efficient and comprehensive battery of neurodevelopmental measures for use with children ages 1-42 months.

The consortium is seeking input from the scientific community to help inform the creation of this neuropsychological, cognitive and social assessment battery.

Please visit the survey page and **give your input by Saturday, November 9**! The survey should take less than 20 minutes to complete and can be accessed at https://www.surveymonkey.com/r/BabyToolboxRFI.
